Opens widely in the mouth. Fresh, silky and elegant. Lingering finish that's remarkable for its distinctive personality, one only the rugged terroirs of Montsant could offer.

Decant it and serve between 14° and 16°C.

### DO MONTSANT, THE DIAMOND IN THE ROUGH

The Designation of Origin DO Montsant is located in the centre of Catalonia, forming a ring around the famous and exclusive DOQ Priorat. DO Montsant is known as the “diamond in the rough”, because although it is a DO which was created only a few years ago, it already has a prestigious reputation throughout the world. In fact, its prestige is growing so fast that DO Montsant is today one of the world's top-rated regions.

Wine has been produced in the Montsant area for thousands of years. It is a very isolated area, depending exclusively on agricultural production methods that respect the environment and which serve as a good example of environmental preservation. Vineyards spread out across the mountainous slopes among olive groves, forests, and stone.
